Experience

InTEAM Tech Bd.

Apr, 2024 – Present

Core Web Development Executive – Php & Laravel

• **Remote Health Monitoring Platform:** Developed a dynamic, cloud-based health monitoring platform that integrates medical-grade wearable devices (smart rings, watches) to collect real-time biometric data (e.g., heart-rate, oxygen-levels, temperature). Designed and implemented a dynamic dashboard for doctors and patients, displaying real-time and historical health data. Developed secure, scalable APIs to receive and store data from IoT-enabled medical devices. Integrated real-time alerts for abnormal readings automatic notifications sent via email and SMS to doctors. Enabled two-way communication: doctors can respond to alerts and provide instant medical advice. Ensured medical data compliance. Used WebSockets for real-time device-to-platform communication. Collaborated with a cross-functional team including hardware engineers, and healthcare professionals.

Portfolios & Personal Project

Ambition Student Consultancy Website & Student Management System:

Role: Full-Stack Developer / Web Developer / Project Lead

- **Project Overview:** Built a responsive, multilingual platform for a student consultancy agency focused on study abroad services (USA, UK, Australia, etc.). The site enables online student application submissions and includes a backend system for managing student records.

- **Key Features:**

Landing Pages & Navigation:

Designed a homepage with clear navigation: Study Destinations (USA, UK, Canada, Australia, Europe) and Services (Student Admission, Accommodation, Parental Guidance)

Online Application System:

Implemented an "Apply Now" workflow allowing prospective students to fill out forms online and submit necessary documents.

Student Records Management:

Developed dashboard features to handle student data: application details, status tracking, document uploads, progress, and communications.

Admin Functionality:

Built secure backend for staff to review, filter, and manage applications, assign statuses, and generate reports.

Notifications & Communication:

Set up automated emails or SMS alerts for updates on application status, interviews, or missing documents.

Media & Updates Section:

Integrated sections for Notices, News & Events, Photo and Video Galleries to showcase student successes and events

Contact & Location Info:

Added office address (Chattogram, Bangladesh), phone numbers, email contact info, and operational hours.

Live URL: <https://ambitionsc.com>

Hoque Poultry Owner

Role: Full-Stack Developer

- **Project Overview:** Designed and developed a custom dashboard and management system for a poultry business to streamline shop operations, financial tracking, and customer communication.
- **Tech Stack: Built** using Laravel for backend development, ensuring a robust and scalable architecture. MySQL was used for secure data storage.

- **Features:**

Sales Reporting:

Developed real-time sales tracking with daily, weekly, and monthly reporting features, including visual analytics.

Shop Due Management:

Implemented a due tracking system to monitor outstanding payments and maintain customer balances.

SMS Notification Service:

Integrated SMS gateway to send automated messages for sales summaries, due reminders, and operational updates.

Owner Dashboard:

Created a user-friendly dashboard interface for shop owners to view financial stats, manage transactions, and track performance.
